

ASHTON & GREEN, LIMITED, Slate, Tile, Brick, Cement, Marble, and Iron Manufacturers and Merchants.

Planed both sides BEST QUALITY WELSH SLATE SLABS,

Of promiscuous lengths and breadths, edges from saw, delivered f.o.b. Liverpool or London, in bulk, in lots of 5 tons and upwards.

Thickness in inches		$\frac{1}{2}$...	$\frac{3}{4}$...	1	...	$1\frac{1}{4}$...	$1\frac{1}{2}$...	$1\frac{3}{4}$...	2 and upwards.
Lot 1.—Between 2 ft. 6 in. and 5 ft. long, and from 1 ft. 6 in. to 3 ft. wide	...	£4 16 0	...	£4 6 6	...	£3 19 6	...	£3 14 6	...	£3 7 6	...	£3 5 0	...	£3 2 6 per ton of 20 cwt.
Lot 2.—Between 5 ft. and 7 ft. long, and from 2 ft. wide and upwards	...	5 15 0	...	5 10 0	...	5 5 0	...	4 18 6	...	4 12 6	...	4 10 0	...	4 8 6 " "
Lot 3.—(A limited quantity) 7 ft. long and upwards, by 3 ft. wide and upwards, or if exceeding 24 ft. superficial	...	—	...	6 5 0	...	6 0 0	...	5 11 6	...	5 6 6	...	5 3 6	...	5 0 0 " "
Approximate number of superficial feet to one ton		300	...	200	...	150	...	120	...	100	...	85	...	75

Slate Slabs prepared to specified sizes are charged as follows:—Lot 1, 15' per ton, and Lots 2 and 3, 20' per ton extra to above prices.

All Slabs cut to angular or other shapes will be measured as square, taking extreme dimensions each way.

Slate Slabs for Urinals, Lavatory Tops, Dairy, Larder and Shop Shelves, Slate Butter Blocks, and every description of Plain and Enamelled Slabs prepared to order. Estimates on application.

Planed both sides BLUE SLATE SLABS,

Suitable for Urinals, Shelves, Lavatories, and any kind of Manufactured Slate Slab, except Cisterns, in random sizes, edges from saw, delivered f.o.b. London (only) in lots of 25 tons and upwards.

				$\frac{3}{4}$...	1	...	$1\frac{1}{4}$...	$1\frac{1}{2}$...	$1\frac{3}{4}$...	2	inches thick.
Lot 1	£4 4 0	...	£3 13 0	...	£3 7 6	...	£3 2 0	...	£2 19 6	...	£2 16 6	per ton of 20 cwt.
Lot 2	4 12 6	...	4 1 6	...	3 16 0	...	3 10 6	...	3 7 6	...	3 5 0	" "
Lot 3	5 11 6	...	5 0 6	...	4 15 0	...	4 9 6	...	4 4 0	...	3 18 6	" "

If the above Slabs are ordered to special sizes add 7/6 per ton.

SLATE URINALS, with or without Earthenware Fittings. See opposite page for prices.

No. 1. Slate Urinal, with No. 60 White Angular Urinal.

" 2. " " 25 Flat Back White "

" 3. " " 26 " Cradle White Urinal.

" 4. " " $1\frac{1}{4}$ Slate Apron.

" 5. " " without Fittings.

Estimates forwarded on receipt of Plans and Specifications.

Head Offices: BURY STREET, LONDON, E.C.; Branches: HOLBORN VIADUCT, E.C.; & TEMPLE GATE, BRISTOL.

June, 1887.

ASHTON & GREEN, LIMITED, Slate, Tile, Brick, Cement, Marble, and Iron Manufacturers and Merchants.

Prices of SLATE URINALS to the Sketch on opposite page and Specification given below.

Delivered f.o.b. Liverpool or London, packed complete in skeleton cases, in lots of 1 ton and upwards.

The Planed or Rubbed Urinals can be sent with Welsh Slate Slabs quoted for on opposite page, or Cisterns on page 3, or Roll Ribbings on pages 6 and 7.

Backs, $\frac{3}{4}$ in. thick, 5 ft. 6 in. high \times 2 ft. wide, rebated on two upright edges to take divisions and ends, and half-rounded top edge. Divisions, 5 ft. 6 in. high \times 1 ft. 9 in. wide \times 1 in. thick, rounded front and top edge, and rounded one corner. Ends the same as divisions.

The Planed Slate Urinals have both sides planed, but the Rubbed and Enamelled Slate are only rubbed and enamelled where seen, the two ends next to where wall would come being left planed.

Kindly note that the Enamelled Slate quoted for are only supplied in London, and that the colours of the Enamel are only self colours, such as Black, White, Green, Cream, Blue, or any of our Class 1 colours.

We shall of course be pleased to quote special prices when large quantities are required, or when the specification is different to that given above.

In the cases of Nos. 1, 2 and 3 Urinals, our prices include cost of White Earthenware Pans. For prices of Pans only, see page 14.

If Slate Channel and Paving are required, the prices will be as follows, packed in cases, and delivered f.o.b. London or Liverpool, with the Urinals:

1 $\frac{1}{4}$ inch Planed Slate Paving, cut to dimensions $\left\{ \begin{array}{l} \text{Lot 1 sizes, 1/ per foot super} \\ \text{Lot 2 " 1/2 " " } \end{array} \right\}$ If rubbed one side, add 1 $\frac{1}{4}$ d. per foot super.

Dished Slate Channel, rebated to take backs, and including Lead Bell Trap, with Brass-hinged Grating:

6 in. \times 2 in., 1/9 $\frac{1}{2}$ d.; 8 in. \times 2 $\frac{1}{2}$ in., 2/9; 8 in. \times 3 in., 3/; 9 in. \times 2 $\frac{1}{2}$ in., 3/; 9 in. \times 3 in., 3/6; 10 in. \times 3 in., 3/9; 12 in. \times 4 in., 5/3; 12 in. \times 6 in., 7/6; per foot run.

Head Offices: BURY STREET, LONDON, E.C.; Branches: HOLBORN VIADUCT, E.C.; & TEMPLE GATE, BRISTOL.

June, 1887.

ASHTON & GREEN, LIMITED, Slate, Tile, Brick, Cement, Marble, and Iron Manufacturers and Merchants.

ASHTON & GREEN'S SLATE ROLL RIBBING, Roll and Saddle detached.

In either Portmadoc or Bangor Slate, drilled ready for fixing.

Prices, f.o.b., London or Liverpool, in lots of not less than 150 feet run, including cost of cases or boxes.

NUMBER OF SIZES.						Diameter of Roll.	Width of Saddle each Side.	Price with Square Joints.		Price with Rebated Joints.		Per foot run.	Number of lineal feet in a Ton.
No. 1.	Roll and Ribbing complete	3 inches	7 inches	s.	d.	s.	d.		
No. 2.	" " "	2½ "	6 "	1	2¾	1	3¾	" "	175 about
No. 3.	" " "	2 "	5½ "	0	11	0	0	" "	290 "
No. 4.	" " "	1½ "	5 "	0	8½	0	9½	" "	340 "
								0	6¾	0	7¾	" "	450 "

INSTRUCTIONS TO FIX.—The Wooden Ridge Piece should be kept up about 1¼ in. clear from the Slating and bevelled on each side, so that the upper edge of the ridge will rest solid on it, and the lower part will then bear lightly on the slating.—The Woodwork should be raised a little at the lower ends of the Hips, to allow for the springing.—Take care to break Joint, and bed the Joints well in Oil Cement. An extra security for transverse joints is to insert underneath them a strip of Zinc, fastened to the Wooden Ridge Piece; this has the same effect as a Rebated Joint.—Bed the Rolis in Oil Cement.—The Screw holes should be first filled with Oil Cement, the Screws then put in, and the heads covered with the Cement.

All Specified lengths of Slate Ridging will be charged ½d. per foot extra.

BEST QUALITY WRITING SLATES.

In cases containing 20 dozen, made up as follows:—

Framed Slates, 4 dozen each, 8 × 6, 9 × 6, 10 × 7, 11 × 7, and 12 × 8, or 5 dozen, 9 × 6, 10 × 7, 11 × 7, and 12 × 8.

F.o.b., London, in lots of 2 tons and upwards, 35/6 per case.

F.o.b., Liverpool, in lots of 2 tons and upwards, 33/4 per case.

A Case weighs about 3 cwt.

A Second quality Slate can be supplied, but we do not recommend it.

Head Offices: BURY STREET, LONDON, E.C.; Branches: HOLBORN VIADUCT, E.C.; & TEMPLE GATE, BRISTOL.

June, 1887.

WILLIAMS'S PATENT SLATE RIDGING, Roll attached to one side.

In either Portmadoc or Bangor Slate, drilled ready for fixing.

Prices, f.o.b., London, Liverpool, or Hull, in lots of not less than 150 feet, including cost of cases or boxes.

No.	Diameter of Roll.	Cover each side.	Round Top and Rebated Joint.		Round Top and Square Joint.		Square Top and Rebated Joints.		Square Top and Square Joints.		Per foot run.	Weight (about) per 100 feet run.

Williams's Ridge, if of a Sharper Pitch than 90° will be charged a little extra.

For Instructions for Fixing see opposite page.

All specified lengths of Slate Ridging will be charged 1/2d. per foot extra.

N.B.—In ordering Slate Ridging, be particular to specify whether A. & G.'s Detached or Williams's Patent.

Slate Ridging does not oxidise and discolour the Slates, as is the case with lead, nor is it likely to be stolen as metal often is.

ASHTON & GREEN'S LATHED-TURNED SLATE COLUMNS.

Without Ferrules or Holes for Spindles. Any length not exceeding 7 feet, f.o.b., London or Liverpool, for quantities of not less than 100 feet. Including cost of boxes.

DEAN'S PATENT STENCH, SILTH, AND GREASE TRAPS.

Certificate of Merit: Highest Award at the Exhibition of Sanitary Appliances, Newcastle-on-Tyne, 1882.

Certificate of Merit: Highest Award at the Sanitary Institute of Great Britain, Croydon, 1879.

Medal: International Exhibition, London, 1874.

Certificate of Merit: At the Social Science Congress, Norwich, 1873.

FIG. 1.

Section of Double Trap.

FIG. 3.

Plan of Trap, with Radiating Bricks.

Dean's Patent Stench, Silth, and Grease Trap possesses every essential property of a good Trap; it is simple, efficient, and is equally suited for the Public Building, the Mansion, or the Cottage, whilst its price is such as to bring it within the reach of all classes. It is already very extensively used, and is largely specified by Architects and Surveyors, and gives great satisfaction. The dip of the Trap is of such a depth that the removal of the receptacle does not unseal it.

A glance at the accompanying woodcuts will at once show the utility of the invention.

Fig. 1 is a sectional view when fixed of a double Trap for externally trapping house drains. It is made in two distinct parts—AA, the outer part, is made of stone ware, BB is a cast-iron receptacle. This receptacle is placed at the bottom of the outer part AA, the rim of same resting upon the ledges C in the position shown in section; D and E are two dips, which together form a double Trap, so that should the sewer gas by any extraordinary pressure force underneath the dip D, it would rise to the surface, and would not therefore communicate with the house; and the configuration and construction of the outer part A is such that no solid matter can rest anywhere but in the receptacle, which, by its handle, can be easily and readily removed, emptied of its contents, and replaced as required. This Trap should in all cases be placed outside the house, and can be made to trap sink, waste, bath, and other pipes, and any drain whereby sewer gas can find its way into a house, and, being placed at a point above the junctions of the water-closet soil-pipes, it prevents any smell therefrom from backing up the other drains in the house. Its facilities for the collection and disposal of subsiding matters make it a first-class Grease Trap to place in the sculleries, &c., as the greasy matter and silth, which so often stop up a drain, will remain in the receptacle, and, as before stated, can be easily removed.

Fig. 2 is a perspective view of a Single Trap, which is very strongly recommended and largely specified. It is without doubt the best Gully Trap that has ever been brought before the notice of the public.

Fig. 3 shows a plan of Trap as fixed with grating and radiating bricks.

Fig. 4 shows the radiating bricks more clearly. These bricks are glazed and moulded to the proper radii, making a neat finish at the surface, and save the cutting of the pavement to the round collar of the Trap.

The Traps are also made of rectangular and square pattern.

FIG. 2.

June, 1887.

BELLMAN'S PATENT GULLY. (STONEWARE)

AVOIDS ALL SPLASHING.
FORMS DRAIN FOR AREA OR SURFACE.

VENTILATES PIPES AND TRAP.

IS EASY OF ACCESS FOR CLEANING.

SIZE—16 in. by 8½ in. by 7 in. deep.

RECEIVES & DISCONNECTS ONE RAIN-WATER PIPE & THREE WASTE PIPES.

THE ORDINARY P OR S TRAP to be used in connection with GULLY, being in a separate piece, can be placed at any angle to meet the drain exactly, thus ensuring a PERFECT JOINT, the GULLY being placed at right angles. This is a GREAT ADVANTAGE over other arrangements made with the Trap in one piece.

Orders should state Size of Rain-Water Pipe and whether Round or Square.

DESCRIPTION FROM "THE ARCHITECT," August 26th, 1882.

The "Bellman" Gully is of stoneware, and intended to carry off the rain-water from the house, as well as through waste pipes, disconnecting the whole from the building so far as any contamination from the drain may be likely to accrue. It will be seen that it consists of an oblong vessel, its size being 16 inches by 8½ inches, by 7 inches deep. Over the bottom opening communication with the trap to the drain is placed a grating to prevent any pieces of foreign matter that may have escaped from sinks, &c., from entering the drain, and as the top grating is loose and large enough to obtain full access to the Gully, it can be easily and readily cleared at any moment. The water from the roof passing direct into the Gully prevents splashing, and to a certain extent this pipe acts as a ventilator to pipes and trap. But a most important advantage the "Bellman" Gully can claim over most others is, that by using a "P" or "S" trap, it can always be fixed at right angles, as the trap can of course be turned in any direction to meet the drain. Thus a perfect water-seal is always obtained, for should the weather be very dry and a deficiency of rain-water occur the constant influx of water from the waste-pipes of the household will effectually secure this against any amount of evaporation, and the constant changing of the water, so to speak, will keep it comparatively fresh. It will be seen that the appliance is of a most simple yet effective character, and it has received high encomiums from influential quarters. As the price at which it is offered is merely nominal, we expect to hear that it will shortly be very extensively adopted. We may add that the firm also manufacture single Gullies on the same principle for sink wastes only, which with ordinary care must always secure a clean and clear sink.

Price, f.o.b. London, in lots of 12 and upwards, 10/- each.

Not including P or S Trap. Galvanized Gratings, 1/6 each extra.

Single Gullies for Sink Wastes only, 4/6 each.

Including cost of skeleton cases.

The JUDGES who AWARDED CERTIFICATE OF MERIT to the "WEATHERLY" SINK TRAP and the "WEAVER" SEWER AIR TRAP were:—W. H. CORFIELD, Esq., M.D.; WM. EASSIE, Esq., C.E.; ROGERS FIELD, Esq., M.I.C.E.; R. THORNE THORNE, Esq., M.B. (Local Government Board), and ERNEST TURNER, Esq., M.R.I.B.A.

THE NEW REGISTERED Weatherly Disconnecter Waste Water Trap,

For completely DISCONNECTING and TRAPPING the Waste Pipes of Sinks, Baths, Lavatories, Cisterns, &c., from the House Drains and Public Sewers.

Obtained Award of Merit, Medical and Sanitary Exhibition, South Kensington, August, 1881.

In consequence of the large demand for the Weatherly Traps, and in compliance with the repeated suggestions from Architects and others, a new and LARGER SIZE Trap is now made, to connect with 6 INCH DRAIN, and with inlet A, adapted to receive end of Rain Water Pipe.

Prices, f.o.b. London, in lots of six and upwards, including cost of skeleton cases: Fig. 2.

For 4 inch Drain ... 14/- each.

" 6 inch do. ... 28/- "

Complete with Iron Grid.

N.B.—A HEAD OR RECEIVER with Iron Grating and two or more inlets can now be had to fit on the top of these Traps. Rain-Water, Bath-Waste, and other Pipes can thus (as well as Sink-Waste) be all connected with one "Disconnecter Trap."

ADVANTAGES:

Perfect Disconnection from House Drain.
Easily cleansed Syphon Trap to Waste Pipe.
Efficient and Accessible GREASE TRAP.
Waste-Pipe Discharge Concealed from View.
Open Yard Gully, Strongly Trapped.
No Splashing or Overflow Possible.

Weaver's Ventilating Sewer Air Trap, as Sketch.

Prices, f.o.b. London, in lots of six and upwards, including cost of skeleton cases.

Certificates of Merit Awarded by the Sanitary Institute of Great Britain, International Medical, and Sanitary Exhibition, &c. Commended by many Medical Officers and Sanitary Engineers.

4 inch.	6 inch.	9 inch.	12 inch.
7/-	9/9	17/9	35/- each.

BEST QUALITY EARTHENWARE CLOSETS.

Delivered f.o.b. London or Liverpool, including cost of crates, in lots of not less than 20. The 20 may be all one pattern or assorted.

THE HOUSEHOLD CLOSET.

The Household Closet is specially designed to supply the demand for a superior Closet that will work satisfactorily in conjunction with Water Waste Preventers. The Rim, being Sharpe's Patent Rim, causes the water to flush all parts of the basin, and the water standing in bottom of Closet prevents the outlet from soiling—thus securing a clean basin.

PRICES.

White	9/6 each.
„ and Printed	11/3 „

TRAPS ALL WHITE.

THE ARISTON CLOSET.

(BEAN'S PATENT.)

PLAN OF CLOSET.

The Ariston Closet has been specially designed for use as a Water Closet and Slop Sink combined. The enlarged funnel-shaped basin admits of slops being emptied without splashing over, while at the same time it does not interfere with the use of the basin as an ordinary Hopper Water Closet. When this Closet is used, separate Slop sinks may be dispensed with; care being taken to provide in connection with the Closet a flushing cistern giving a rapid discharge of water.

PRICES.

White	21/9 each.
„ and Printed	24/6 „

The Basin with right-hand or left-hand side Inlet for waste pipe from Sink or Bath, 1/- extra.

TRAPS ALL WHITE.

(Continued on opposite page)

BEST QUALITY EARTHENWARE CLOSETS—*continued.*

THE VICTOR.

This Closet is, what is usually termed a Wash-out, but the outlet from basin (which in the ordinary Wash-out is so great an eye-sore) is not visible. The Rim, being Sharpe's Patent Rim, causes the water to flush all parts of the basin—thus securing a clean basin. This Closet can be used with any two-gallon Water Waste Preventer giving a quick flush.

ROBSON'S PATENT DRIP TILES,

FOR WEATHERING CORNICES, CHIMNEY STACKS,
PARAPETS, PARTY, EXTERNAL, AND GARDEN WALLS.

BY SPECIAL APPOINTMENT TO THE METROPOLITAN BOARD OF WORKS.

17/6 per 100.

12/6 per 100.

Prices f.o.b. London, including cost of skeleton cases, in lots of 250 and upwards.

No. 1 Tile is adapted to the weathering of cornices ; being made of Terra Cotta, it forms a hard weathering and top member, the lower edge being hollowed forms a proper finish and drip, which prevents the rain water running down the face of the mouldings.

No. 2 Tile is adapted to the weathering of walls, chimney stacks, &c., it forms a neat finish to the wall, and entirely prevents the rain water washing out the mortar joints and perishing the work ; it is 60 per cent. cheaper than the ordinary tile creasing and makes a better finish ; these tiles have been highly approved of by the profession, and are being largely used.

THE "SHERBROOKE" PATENT COOKING REGISTER STOVE.

ILLUSTRATION I.

Showing the Oven placed in for Cooking.

GUARANTEED TO CURE SMOKY CHIMNEYS.

DESCRIPTION.

Illustration 1 represents the Stove with the Consuming Chamber closed over the fire and the Oven placed in for cooking, and when no longer required for this purpose the oven is easily removed, and Illustration 2 represents it with the Oven taken away and the Hot Plate thrown back; an ordinary Open Fire is then obtained. The smoke has to pass over a Plate before entering the Side Flues; as this Plate becomes heated, the smoke is consumed, and a draught in the Stove itself obtained, and we guarantee it will thoroughly cure any hitherto incurable smoky chimney. *It has been successfully fixed where every other attempt has failed.*

ITS GREAT ADVANTAGES are—

It is a certain cure for a Smoky Chimney. It is a Fuel-saving Grate. It is a Smoke-consuming Grate.

The Prices do not exceed those of the ordinary Register Grate of equal weight and finish.

It has the appearance of a handsome Hob Stove, which can be with the greatest ease converted into a useful Cooking Range, and the Oven is guaranteed to bake equal to any Oven in the best Close Fire Kitchener ever manufactured, and between the Oven and the Hot Plate there is room to put a saucepan, boiler, frying pan, or kettle.

It is a great Heat Generator. The Fues being constructed at the side of the Stove, and the Consuming Chamber being placed directly over the fire, perfect combustion is obtained; moreover, all the cold air must pass through the Consuming Chamber, and thus becomes heated before it enters the chimney; this precludes all possibility of a down draught. The heat that in an ordinary stove goes up the chimney is with this stove given out into the room.

ILLUSTRATION II.

Showing the Perspective and the Oven taken away.

It is obvious that this most valuable invention cannot fail to be a great boon in Nurseries, Apartments, Model Dwellings, Cottages, &c.; and it is supplied in superior Finishes for Dining Rooms, Libraries, &c. It does not require an experienced man to fix it, as it is merely placed in the opening of the brickwork and filled up at the back with fine gravel or sand. It is important to fill up behind with this or similar material, as by so doing the greatest amount of heat is obtained, and with a very small fire a large room can be heated. It will its save cost in the smaller consumption of fuel compared with any other Grate in less than Twelve Months.

IT CAN BE SEEN IN USE IN OUR LARGE OFFICES, 11 to 15, BURY STREET, ST. MARY AXE, E.C.

Price	£3 3 3	£3 8 0	each.

DELIVERED F.O.B. LONDON.

THE
"Sherbrooke" Patent
Self-Setting Cooking Range.

CERTAIN CURE FOR SMOKY CHIMNEYS.
FUEL SAVING & SMOKE CONSUMING,
AND SELF-SETTING.

DESCRIPTION.

THIS Range is made on the same principle as the Patent "Sherbrooke" Register. The centre panel over the fire is hollow, and before the smoke enters the flues it has to pass over the surface of the heated plate; this not only consumes all the worst of it, but prevents any cold air entering the flues, and it is therefore obvious that a great amount of fuel is saved. In addition to this, a great advantage is obtained by the quickness with which a fire can be lighted, and in a marvelously short time a kettle full of boiling water can be obtained, with the least possible consumption of fuel. The hot-plate smoke-consuming chamber creates a draught, and immediately the fire is lighted the flames (there being no other outlet) lick round this plate over which the kettle is placed. In answer to objections which might be raised that this rapid draught would consume more fuel, we beg to point out that it is regulated by means of the damper, and that, as it is impossible for cold air to get into the flues, every particle of fuel is utilised. The smoke-consuming panel can be thrown back, and in this way it is converted into an ordinary open fire.
